

Track One*.

Security Systems

Track One – Mobile Phone and Emergency Call Device.

Track One is not only a mobile phone but also an emergency call device. The modern GSM-phone is equipped with many functions for the state-of-the-art communication. It also enables access to e-mail and the Web via a PC with 14.4 kbps built-in GSM data and fax modem. Thanks to the integration of an additional high-performance GPS receiver, in case of an emergency the Emergency and Monitoring Center of the Bosch Communication Center can be informed immediately about the localization with an accuracy of a few meters.

* Track One is a registered trademark of Benefon Oyj,
FIN-24101 Salo, Finland
