

Track Pro*

Security Systems

Track Pro – GSM+GPS Telematics Phone.

Thanks to an easily programmable multifunction button Track Pro can be configured for several different purposes, from easy-to-use safety device to mobile unit for resource management applications.

From now on, not only fleet but personnel such as service personnel, police and couriers can be managed with the same device. In addition, Track Pro can be connected to several monitoring centers. Hence, the internet user can for example locate the position of the device while at the same time the emergency call function and different service functions with co-ordination of the corresponding (emergency) measures are managed from the Emergency and Monitoring Center of Bosch Communication Center.

Performance specifications.

- Emergency Call and alarm function with additional indication of the network co-ordinates
- Phone function
- Automatic alarm activation when a specific area/region is entered or left (Go area/No go area)
- Silent emergency alert
- Registration of a fixed phone number, e.g. the phone number of a relative

- Continuous inter-active tracking and exact localisation with transmission of data such as mode, battery status, position coordinates, time, date, speed and direction
- Status messages (e.g. destination reached, log-on/log-off at the Monitoring Center)
- Tracking
- If the safety clock isn't reset within a programmed time it will set off automatically an alarm
- Integrated GSM data and fax modem
- Short Messages System (SMS up to 640 characters) with T9 text input
- Additional features: vibrating alert, calculator, phone book, calendar, calendar appointment manager, clock, alarm clock, etc.

Colors.

- Graphite gray
- Marine metallic blue
- Metallic blue
- Yellow

Technical details Track Pro

- GSM 900 and GSM 1800 MHz dual band networks or GMS 900 and GSM 1900 MHz dual band networks
- 12 channel, high-performance GPS receiver
- GPS message sending when alarm is activated
- GPS energy save mode selectable
- Assisted GPS (AGPS)
- Connector for external active antenna
- External NMEA 0183 interface
- Position coordinates display
- Remote configuration
- Weight: 158 g
- Dimensions: 129 x 49 x 23 mm
- Volume: 132 cm³
- Lithium ion battery 1200 mAh
- Standby operating time: 72-200 h**
- GPS operating time: 17-170 h**
- Talk time: 3.5-10 h
- Charging time: 3 h

Accessories***

- Cross-country antenna
- Spare antenna
- Fast mains charger
- Plug & Play hands-free headset
- Headset kit
- Leather bag
- Outdoor carrying holster
- Trendline carrying holster
- Bike mounting brace, lockable
- Cigarette lighter charger
- BeneWin Pro Software and data cable
- External active GPS antenna
- NMEA-0183 cable
- Data cable
- Hands-free Track, DSP for external GSM and GPS antenna (without GPS antenna)
- GPS/GSM antenna for car kit
- GPS antenna for car kit

** Operating times can vary substantially depending on distance to base station, SIM card, temperature, network settings, network usage and GPS receiver operating mode
